

## Data Ethics Canvas

<p><b>Data purpose</b></p> <p>What is the main purpose for collecting the data?</p>	<p><b>Data sources</b></p> <p>What are the system's key data sources?</p> <p>Is any personal data involved? Or data that is otherwise sensitive?</p>	<p><b>Data limitations</b></p> <p>What are likely limitations of the data?</p> <p>Consider: biased data, incomplete data, poor-quality data.</p> <p>Also consider limitations of data decision-making such as team composition.</p>
<p><b>Positive effects</b></p> <p>What stakeholders are likely to benefit from the system? How?</p>	<p><b>Negative effects</b></p> <p>What stakeholders are likely to be harmed by the system? How?</p>	<p><b>Minimising harm</b></p> <p>What are ways in which the identified harms could be minimised?</p>
